General information

A Products – Stock keeping
B Products – Generally available in stock.
C Products – Special orders. May be in stock in low quantities. To produce a new batch, we need commitment on min. 20 packs before scheduling manufacturing.

CE Marking
All products are CE marked according to the European IVD Directive 98/79/EC for In Vitro Diagnostic Medical Devices. IVDR is underway and expected in 2026.

Storage
Most tablets are stored at room temperature. All products marked must be stored refrigerated at 2-8°C. Transports can occur without cold chain.

Packaging

NEO-SENSITABS™
(Product codes ending on 12)
Neo-Sensitabs™ are packed in single cartridges containing 50 tablets. Sales unit size contains 5 cartridges x 50 tablets in one box = 250 tablets.

DIATABS™
(Product codes ending on 11)
Diatabs™ are packed in single vials containing 50 tablets. Sales unit size contains 5 vials x 50 tablets = 250 tablets wrapped in film.

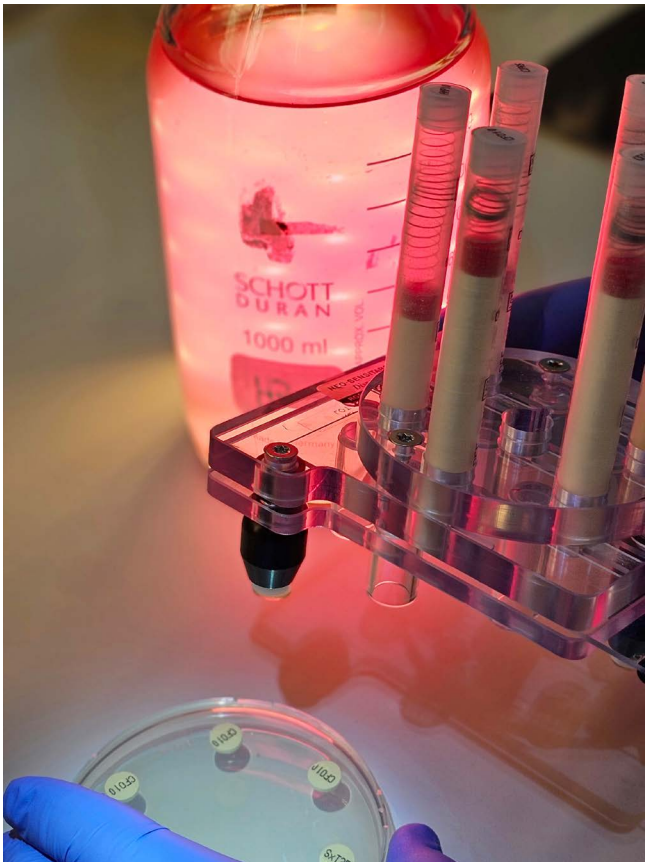
ROSCO DIAGNOSTICA KITS™
(Product codes beginning with 98)
All Rosco Diagnostica Kits include 50 tests except kit no. 98012 and 98018 that include 100 tests.

Accessories
Accessories are packed individually in boxes containing 1 dispenser per box

Reagents
All reagents are packed in boxes containing 1 x 20 ml + pipette.

Instructions for Use – All products
The Instructions for use are available on our website www.rosco-diagnostica.com in PDF format in up to 8 different languages.

* Rosco Diagnostica reserves the right to make changes without previous notice.



ROSCO DIAGNOSTICA KITS™

- For detection of resistance mechanisms
- Simplified and easy-to-use testing

Rosco Diagnostica acknowledges the need for detection of resistance mechanisms. In order to supply our customers/users with a convenient system for detection, assembled kits with disc diffusion tablets are available.

1. BETA – LACTAMASES

a) Rapid Colorimetric Kits (15 min-1 hour)

98022 - Rapid ESBL Screen kit: ESBLs
98023 - Rapid BLUE CARB Kit: Carbapenemases
98024 - Neo-Rapid CARB Kit: Carbapenemases

Rosco Diagnostica Rapid Colorimetric Kits have the following advantages compared to competitors:

- More rapid results
- No reagent preparation needed
- Longer shelf-life
- Stable crystalline forms of antimicrobials
- Simple and fast procedure 5 min/test
- Reduced amounts of lysis buffer
- Lower cost
- Possibility to detect new genetic variants of resistance mechanisms (compared to PCR)

b) Phenotypic Methods (18 hours)

98007 - AmpC Confirm Kit: AmpC Enterobacteriaceae
98008 - ESBL + AmpC Screen Kit: ESBL + AmpC
98010 - Triple disk for detection of KPC+MBL
98011 - ESBL Confirm (acc to CLSI) Kit: ESBLs
98012 - ESBL Confirm (Chrom AmpC) Kit: ESBLs
98014 - Total ESBL Confirm Kit: ESBLs
98015 - KPC, MBL and OXA-48 Confirm Kit: Carbapenemases
98016 - Total Metallo-beta-lactamase Confirm Kit: MBLs
98019 - Total ESBL+AmpC Confirm Kit: ESBL + AmpC
98025 - KPC/MBL inP.aeruginosa/Acinetobacter, version 2

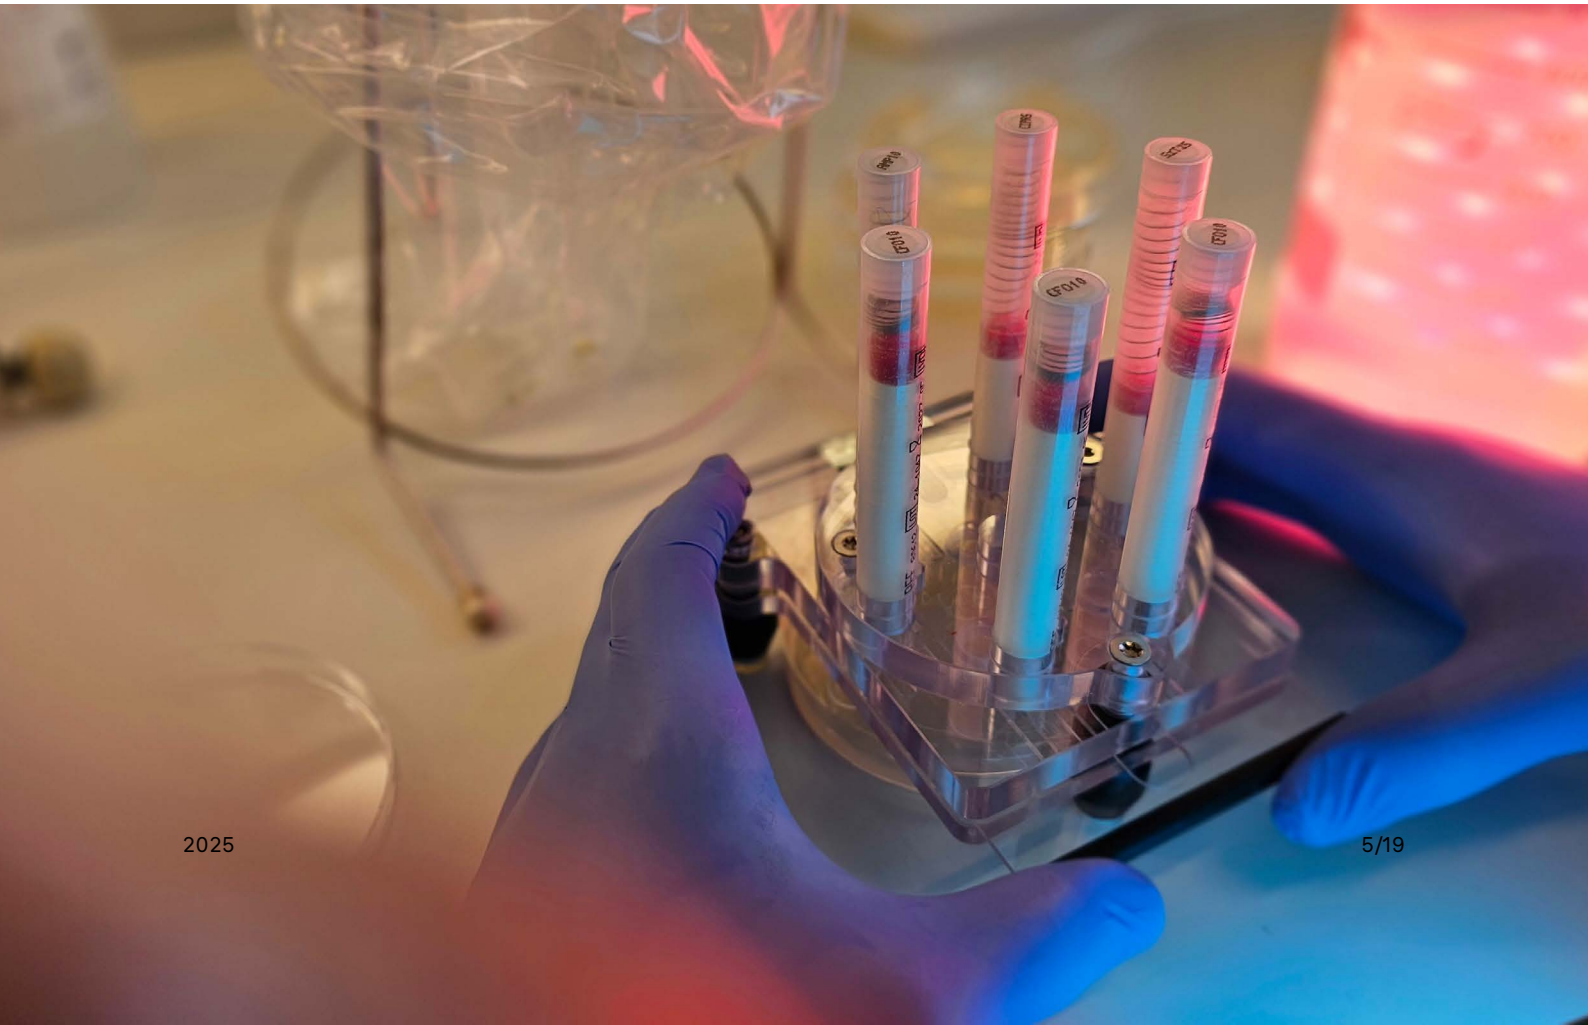
ROSCO DIAGNOSTICA KITS™

WHY PHENOTYPIC METHODS?
Phenotypic methods are useful for detection of beta-lactamases. They are cheap and easy to perform and interpret. Molecular techniques, on the contrary, are expensive, require significant expertise and do not identify novel and emerging resistance genes or even slightly structurally modified genes.

2. OTHERS

98009 - Urine Kit Private Practice
98017 - Detection of hVISA, GISA, VRE, Daptomycin resistance
98018 - Detection of COLISTIN resistance in Enterobacteriaceae, P. aeruginosa and Acinetobacter spp.

The kits are complete with ready-to-use cartridges of the necessary combined NEO-SENSITABS™ or DIATABS™ and a guide to their use. Documentation is available at www.rosco-diagnostica.com/documentation



ROSCO KITS™

DIATABS™

Identification of Bacteria and Fungi

Rapid tests (4 hours) based on enzymatic reactions
Long shelf-life: 2 to 4 years

- Highly Flexible
  - Can be used in combination with Neo-Sensitabs™ helping laboratory professionals make a rapid, accurate diagnosis

- Versatile - Multiple Purpose
  - The Diatabs™ system offers the opportunity of finding the most appropriate and economical tests for your purpose.
  - Screening tests for identification or differentiation
  - Identification of most common species
  - Supplemental and confirmatory tests to automatic systems and commercial kits
  - Full species identification

- Economical Solution
  - Cost saving of up to 50% compared with available automatic systems.

Rosco Diagnostica's concept for the diagnostic tablets DIATABS™ is the flexible choice in identification of important bacterial species.

DIATABS™ A

SKU	Product name	Group	Storage	CLSI	EU-CAST
10311	Cloxacillin	DiaTabs A	DK		
10411	Phenylboronic Acid	DiaTabs A	DK		
40211	Bacitracin Low 0.4 U	DiaTabs A	DK		
40411	Bile Esculin	DiaTabs A	DK		
42511	Factor X	DiaTabs A	DK		
42611	Factor V	DiaTabs A	DK		
42711	Factor X + V	DiaTabs A	DK		
44211	Optochin 10 µg	DiaTabs A	DK		
44311	Oxgall 1000 µg	DiaTabs A	DK		
44611	S.P.S. 1000 µg	DiaTabs A	DK		
45011	Tellur 500 µg	DiaTabs A	DK		
45511	Beta-Lactamase (Acido)	DiaTabs A	DK		
45711	Oxidase	DiaTabs A	DK		
48811	Tributyrin	DiaTabs A	DK		
50311	ONPG (Beta-Galactosidase)	DiaTabs A	DK

53111	Mannose	DiaTabs C	DK		
53211	Melibiose	DiaTabs C	DK		
53411	L-Rhamnose	DiaTabs C	DK		
55911	Alkaline Phosphatase	DiaTabs C	DK		
57311	Porphyrin (d-Ala)	DiaTabs C	DK		
57811	TDA or Indole (Tryptophan Deaminase or Indole)	DiaTabs C	DK		

Products marked with are to be kept refrigerated at 2-8°C for longer term storage. Not sensitive towards room temperature transports.

DIATABS™ C - Special request products

SKU	Product name	Group	Storage	CLSI	EU-CAST
57911	Urease/TDA	DiaTabs C	DK		
58911	Cycloheximide	DiaTabs C	DK		
59011	PGUA (Beta-Glucuronidase)/Indole	DiaTabs C	DK		
59511	Indoxyl Acetate	DiaTabs C	DK		
59611	Deferoxamine 250 µg	DiaTabs C	DK		
59811	Pyrazinamidase	DiaTabs C	DK		

Products marked with are to be kept refrigerated at 2-8°C for longer term storage. Not sensitive towards room temperature transports.

NEO-SENSITABS™

Susceptibility Testing

Unique characteristics ensure that NEO-SENSITABS™ from Rosco Diagnostica are ideal for use in the laboratory:

- Long shelf- life (Due to use of active substance in dry-crystalline form)
- No degradation in activity after opening of cartridges
- Most products can be stored for 3-5 years at room temperature (25˚C)
- Cost-efficient and reliable method
- Extensive information on susceptibility testing

Neo-Sensitabs™ are calilbrated for susceptibility testing according to EUCAST and CLSI guidelines (Marked in product list).

Comparative studies from Rodrigues-Villalobos(1) and Justesen(2) showed excellent correlation between Neo-Sensitabs™ results (EUCAST) and paper discs.

Pricing
All price quotes are ex-works and excluding freight cost. Price quoted from Rosco Diagnostica is current price when the order is placed. Prices can change without notice.

Pre-Paying customers
A prepayment shall be paid within 14 days of the pro-forma date, or the order will be considered annulled. Rosco Diagnostica is entitled to withhold any further deliveries, until all amounts due to Rosco Diagnostica has been settled. Rosco Diagnostica reserves the property rights of the goods until payment of the goods has been duly made. There will be an interest of 2%, on all overdue invoices. If delay in payments the credit may be revoked.

Returns & Complaints
Customers should examine goods immediately after delivery. Any complaint whether on invoice or delivery shall be made within 10 days after receiving the products. Please contact Rosco Diagnostica via tel. (+45) 43 99 33 77 / +45 93 40 65 65 or e-mail info@rosco-diagnostica.com before returning any items. We only accept returned goods which have confirmed approval from Rosco Diagnostica. Products may not be returned if the packaging has been defaced in any way.

Shipments
Freight charges will be added to the invoice as a separate item. There is a minumum charge per shipment for shipping and handling.

Order handling fee
Minimum order is 400 EURO/3000 DKK, order handling fee of 60 EURO/450 DKK will be added to any orders less than the minimum.
